

# FIRE ALARM SYSTEM DESIGN & VERIFICATION

## WHAT DO WE NEED?

- Scaled plans of the building
- Category of system required  
Remember – for category L2, L5 or P2 systems specific information is required.

### Other helpful information such as:

- Full specification for the proposed system
- Section drawings
- Site photographs
- Additional site information, like areas with high ambient noise levels, harsh environments.

## WE'LL SEND YOU

- A drawing of the fire alarm system design
- Our design notes, including any assumptions we've made from the plans for your review
- BS5839-1:2017 design certificate.

## SYSTEM INSTALLATION & COMMISSIONING

- Any site changes? We're here to advise on the compliance of the designed system.

## FIRE ALARM SYSTEM VERIFICATION

QDOS can offer an independent Fire Alarm Verification service. We survey the installation and verify for compliance to BS5839-1:2017.

Once complete, we'll provide a full report with photos and issue a BS5839-1:2017 verification certificate for all compliant systems.
